AMUSEMENTS.

"Nobody's Claim" at the Park.

"Nobody's Claim" has been seen so many times at the Park that most of the regular patrons of that popular playhouse must surely know it by heart, but, notwithstanding its numerous presentations in this city, the old border drama continues to be just as great a favorite as when it was first enacted many years ago by Joseph Dowling and Sadie Hasson. The Holden Brothers' company began a half-week's engagement at the Park in this sensational melodrama yesterday, and at both the afternoon and evening performances the theater was sold out, with many spectators standing. "Nobody's Claim" was one of the first of the stage stories of the wild West. Patterned after Bret Harte's tales, it struck the fancy of the people who love melodrama when it was first brought out, and has retained its hold on the patrons of the popular-price theaters ever since. It has been given an unusually good scenic equipment by the Holdens, and at the two performances yesterday was received with as much enthusiasm as if it were a brand-new produc-

Bernice Howard plays the leading rolethat of a little mountain girl named Madge, who has a way of getting everybody into trouble and then out of it again. Miss Howard is an unusual actress. She was at the Park with the Holden Brothers' organization-the stock company-last spring, luring its four weeks' run, and in the course of that engagement she played all sorts of characters from the naughty Sapho in the Frenchy play of that name to the emotional Glory Quayle in Hall Caine's "The Christian." And now she turns up as the soubrette of a wild and woolly melodrama-wearing short dresses, a cunning curly wig and an innocent smile, and doing a couple of comic songs and a dance or two. There's versatility for you! She deserves every bit of the applause she re-If called upon to do it, she could probably come out between acts and do Ophelia's mad scene from "Hamlet" or recite "How Salvator Won.

There are other old favorites in the cast besides Miss Howard. Norman Gilbert, the leavyweight villain of many a melodrama, outs in an apeparance as the bad man of the story-a fellow with an alias and a suit of dazzling Mexican clothes. He acts his part in his own wicked way and gets himself thoroughly detested by the good folk of the gallery before he has finished his first speech. Jack White plays the part of the hero, and, although he fails to make the part as interesting as Joseph Dowling was wont to make it, he gets along all right and wins the good will of the spectators. Miss Jean Harlan and Maud Holden play their parts in good style, and the other leading characters are portrayed acceptably by Jack Ward Kett, Fritz E. Boone, Joseph Thayer and Albert Adams. Little Alice Berry, one of the best juvenile singers on the stage, contributes a specialty between the first two acts, and scores a great hit with her popular songs. She is an original little performer and always has something good to offer whenever she appears at the Park. "Nobody's Claim" will continue to please large audiences the rest of the week. with the usual daily matinees.

Edward Davis, who used to be pastor of the Central Church, in Oakland, Cal., has just signed a contract with the managers of the Alcazar Theater stock company, in San Francisco, to become the leading actor of that organization for this season. Mr. Davis gave up the ministry about a year ago, admitting at the time that he was stage-struck. He joined the Central Theater stock company in the Pacific metropolis-a company that produces melodramas of the most sensational kind, and played all sorts of parts at \$15 a week. He showed so much ability that the managers of the Alcazar company decided that he was good enought to play leading roles, and proceeded to offer him the job, which he accepted without delay.

David Belasco has just announced that his star, Mrs. Leslie Carter, will not be seen in a new play this season, after all, but will continue to appear in "Du Barry" throughout the entire theatrical year. Her season will be inaugurated early in the fall at the Belazco Theater, New York, where she will play "Du Barry" for ten weeks. She will then go on a tour of the large cities of the country where the play has not yet been acted. In the spring Mrs. Carter will go to London, where she will make "Du Barry" known at His Majesty's Theater-Beerbohn Tree's playhouse. Special to the Indianapolis Journal. DECATUR, Ind., Aug. 13.-One of the most brilliant social functions of the season was the marriage of Miss Amelia Smith and Mr. Charles Christen, popular young people of Decatur. The marriage took place this morning at St. Mary's Catholic Church. The Rev. H. Theo. Wilken performed the ceremony. The bride and groom were accompanied by three bridesmaids and three groomsmen. The bride wore white dotted nousseline de sole over white silk. She also wore a white tulle silk veil and feather pompons. The bride is the daughter of Mr. and Mrs. Joseph Smith and the groom is one of the city's most prominent contractors. The couple left for the East on their wedding trip. They will be at home after Sept. 14 in this city.

A Hint to Housewives. Everyone who knew Mrs. Bride knew

about the mysterious disappearance of her apostle spoon. On her wedding journey through Europe she had collected her dozen apostle spoons at the cost of much selfdenial in the way of tempting novelties in Venice and alluring chiffons from the Bon Marche and Regent street. Upon her return to Indianapolis her apostle spoons had made their initial appearance at a small and select luncheon, and were the envy and admiration of her friends. After the company had dispersed, Mrs. Bride repaired to the kitchen personally to wash her best tableware, when she discovered that her gold St. Peter spoon, bought in and Mrs. Stuyvesant Fish, are said to be Rome under the shadow of the Vatican itself, was missing. Every known means of discovering the precious spoon was resorted to. Detectives were summoned, and all sorts of possible and impossible places searched. Mrs. Bride herself frantically poked a steel wire down the drain pipe in the sink, although her commonsense told her that it was an impossibility for the handle, much less the bowl of her spoon to have passed through the orifice in the sink. The sight of the other eleven spoons of the nineteenth centuries. was as gall and wormwood to their owner. She had serious thoughts of presenting them one by one to eleven friends in order that the sight of them might not remind her of the lost St. Peter spoon. One day Jessie Bartlett Davis, the distinguished about a year after the tragedy a woman called on Mrs. Bride at 7 o'clock in the ment. Sep-Make a French salad dressing with an ex- tember is coming on apace. Once the children resume their studies it is difficult to find time for fitting and the like, and wise mothers are preparing a few changes, at least, in advance. To be sure, September means summer weather. It will be October before any change to thicker frocks will needed, but many girls return to boarding school during the month and must be prepared therefor, while others will be so far occupied with study as to make forethought eminently desirable.

Children's and young girls' styles are

apt to undergo less radical change than falls to the lot of the wardrobe owned by the elder sister and the mamma, but, in spite of that fact, show certain tendencies and quite sufficient novelty to mark the change of season. This year the tendencies are all toward long, drooping shoulders and they are to be noted in the costumes of the younger contingent as well as in those of their elders, although in somewhat less marked degree. Full skirts and yokes are seen upon the latest imported gowns and reappear in the frocks designed for young girls. One of the prettiest dresses yet seen is made with a full skirt that falls below a shaped yoke that exactly matches the bertha on the waist. As I saw it the material was Delft blue cashmere and the trimming the black velvet ribbon that suits the material so well, but the design ties of Endeavor officers. A. L. Pipings of red are admirable and eminently fall-like, blue, green and all colors can be so used and often still bigger bits can be introduced. A most stylish and satisfactory dress for a girl from eight to fourteen years of age is made with a shield and collar of contrasting materials and lends itself to combination with singular success. The model shown me was of the shepherd's check in blue and white and the trimming was of silk braid with the shield and collar of white banded with blue, but one could readily see how many varying combinations might be made. Black white trimmed with braid in which are threads of red is charming, or with bands of white piped with color, and, as the season promises braids galore, all sorts of good things will be offered by the time school dressmaking is fairly under way. The dress to which I refer is made with a five-gored skirt finished by a circular flounce and a waist that is open at the neck to expose the shield and closed in double breasted style below that point while at the shoulders are plaits in Gibson style. The back is plain and the sleeves are the full ones we all are wearing, and form full puffs above the wrists, while they fit snugly at the shoulders. The entire little costume is charming. It is simple at the same time that it is stylish and it seems to exactly fill the need of the school girl. I confess to a great preference for the check, but there are plain materials without end, and plaids are always in vogue for autumn dresses of the sort. Importers and wholesalers already are showing these last in some suggested rather than brilliant colors that are quite fascinating and are much to be commended for school wear. Hard usage must be looked for. Active young bodies never should be hampered by consideration of clothes. The fabric that can be trusted to endure all things is, therefore, the one to be sought, and plaids have the merit of showing soil far less readily than plain materials. Military effects are promised for trimmings. Nowhere are they ore suitable or attractive than on the frocks worn by young girls. Tiny gold and silver buttons and fancy braids showing threads of gold and silver can be relied upon as correct, and make most admirable rimming for the dresses designed for the

NOT SUITED TO LITTLE GIRLS Shirtwaists and shirtwaist dresses will be much worn by the girls of twelve and older and can be made most attractive, although in my opinion fourteen is quite young enough for dress of the sort. By all means let us keep our children young while we can, and nothing tends to that result more surely than simple, youthful dressing. The shirtwaist is not a childish garment and is appearance, although each individual is a rule to herself. As I write I recall two sweet and lovely girls of the same agetwelve years. Anything and everything to give the drooping line might fairly be said to be correct, yet it is not absolutely essential, for one sees shirtwaists elder remained in commerce and married of the plainer sort which yield to the tendency only in showing shoulders cut longer than has been our wont. Skirts worn with these waists, whether in contrast or of the material, are simple. Nothing is in poorer taste than elaboration on a dress of the sort. Favorite modes are five and seven It was on one of these occasions that gored, tucked in perpendicular groups and plaited, but little, if any, trimming is used. Street costumes for these girls of fourteen to sixteen are modeled somewhat closely after those of the older folk, and include long coats and skirts en suite. For these the Russian style, the plaited and the plain fitted coats are all correct, with skirts that flare at the lower portion. A sensible model for a skirt is nine gored, with in ve ted plaits to flounce depth at each seam With it can be used any of the coats mentioned, but none will be found better than how the publishers rejected "The Holy the one showing applied box plaits, inas-City" again and again because it was too much as its lines give height and slendersombre in tone. From him they wanted ness. Separate coats take much the same forms, although the loose all-round coat in box style will be much worn, and is peculiarly well suited to the school girl, as it

slips on and off with greater ease than does any other sort. Beneath the coats of the suit odd waists must worn, but for school they should be of the plainest and in shirt style. To return to the younger girls from eight delightful models for whole frocks that are simple and childish, while eminently smart A most attractive plaid frock has a cape yoke of plain color that droops well over the sleeves and is edged with a frill. Another shows a similar finish, but is edged with braid in place of the frill. Other frocks again are made with yokes and outlining bands, and are as charming as they are simple and childish. A most satisfac tory one is made of figured challie. with black, and shows a yoke of plain blue silk and bands of the same, edged with

black and white braid. SOMETHING QUITE NEW. A distinct novelty is made to be worn with a guimpe and combines a plaited skirt

The CORNER STONE OF SUCCESS!

Young men and women should learn the uses, not the abuses, of money; that money is crystallized labor; that each dollar represents a value: that economy in small change is the foun-

dation of fortunes. Our Savings Department receives \$1 or more, and pays 3 per cent. interest, compounded semi-annually.

are admirable for school frocks and this with a waist portion that consists of straps attached to a round bertha. The skirt i side plaited and joined to a plain circular To the yoke are attached straps, three at the front, two at the back, which in turn are sewed to the bertha, that extends well over the shoulders. The guimpe worn beneath is seen between the straps, and the whole result is most satisfactory As I saw the frock it was made of deep red cashmere, piped at the edges with white. and was worn over a guimpe of white lawn, but any soft material can be utilized. For girls from four to ten it is charming, but is not often seen on older ones, although it is perfectly appropriate for the dignity of twelve years unless the wearer be large for her age. Personally I admire guimpe frocks greatly, and would urge their wearing by all girls, for present styles warrant them for women, and there seems no need for any time of leaving off.

Box plaited frocks are much liked for school and are eminently simple as well as correct. A recent one is plaited at both back and front from the neck to the edge of the skirt and is finished with a big sailor colliar. Others, for the girls under twelve, are made in Russian style and give the long lines that always are satisfactory, and sailor styles are always found. Taken for all in all I know of nothing better or more serviceable than those same dresses copied after the lads of the sea. They allow free movement, they always are becoming and they are apt to satisfy their wearers thoroughly well. Late models show applied yokes on the blouses that are made without openings and are drawn over the head with either gored or gathered skirts, and suit the wear and tear of school time admirably well. Others show plaited skirts, but there always is the big sailor collar that suits childish figures so well and the contrasting shield that marks the style. To my taste the simple designs are preferable, but slightly elaborated ones, with tucks in the blouses and yokes that include sleeve caps are shown among autumn models. Coats for the younger girls are, for the most part, either reefers or in box style and three-quarter or full length. The reefers are jaunty, mean freedom and have a variety of points to commend them, but many mothers prefer the effect of the long coat These are made of lightweight cloth for school wear and are braid trimmed. Reefers are in the familiar style, but with full sleeves and are shown in blue, brown, tan and mixtures, but are peculiarly satisfactory in blue with brass buttons after the genuine sailor style. Further changes will not be announced for a few weeks. Styles for school frocks can, however, be relied upon as continuing the winter through. Not even capricions Dame Fashion compels a second change in the young folks' models. but other coats of various sorts will be shown in time for cold weather, and, when they come, or when the designers shall have decided upon what they are to be, I

shall write thereof at length. MAY MANTON. HOME DRESSMAKING HINTS.

demand. They are greatly in vogue both for the entire gown and the separate bodice and show almost endless variety. This one is made of white batiste, unlined, with tiny pearl buttons as trimming and is charming: but the design can be reproduced in any of the season's materials, and later, will be admirable for soft wool and silk waistings when the fitted lining will be found desir-

The waist consists of the foundation, that is smoothly fitted and closes at the center front, the fronts and the back. The back is tucked in groups that extend for its entire length and give tapering lines of the figure,
